

VAAGDEVI COLLEGE OF ENGINEERING UGC-Autonomous

CORE VALUES

The following Core Values articulated as per the Vision and Mission and Objectives of our College are always at the heart of Vaagdevi College of Engineering (VCE), Warangal and enliven the institution's academic and co-curricular programs and its operating ethos. These values ground and enliven the VCE's identity, heritage and commitment to knowledge for both personal enhancement and social progress.

Technical Knowledge:

Unique contributions in terms of technical knowledge to every student in the community and to value diverse perspectives.

Girls and young men, women whose education had been interrupted by family responsibilities especially at Post Graduate level, those who were the first in their families to attend college -- in different eras, these groups lacked opportunity to acquire an education, and even the boys alike. Respect for personal dignity and individual potential has been consistently prompted us to welcome these students and help them succeed.

Excellence:

Excellence commits us to challenge ourselves to utilize our God-given gifts -- intellectual, social, physical, spiritual and ethical

Our commitment to excellence impels both individuals and the College itself to consistently strive for outcomes that are exemplary rather than simply satisfactory. Such striving for excellence touches all aspects of College life from academic programs to sports, from student services to campus environment, from recruitment to publications, from special occasions to daily activities. This value also inspires the College community to recognize its members' significant achievements and contributions to the welfare of others.

Compassion:

Compassion compels us to stand with and embrace others in their suffering.

This value reflects the reality that demands commitment, as well as sensitivity, understanding and care. Members of the VCE stand with their colleagues in times of personal crisis or grief and express compassion through multiple endeavors that respond to the needs of others.

Service:

Service calls us to use our abilities to advance the genuine well-being of our community to interact with the industry.

Service to students is a basic tenet of life at VCE, as is service by students, staff and faculty -- each lending personal skills and professional expertise to assist others through campus activities, off-campus internships, service trips and numerous volunteer opportunities

that extend the ethos and the value of service to meet the challenges of the modern industry and society.

Integrity:

Integrity gives us the ability to realize the greater good in our actions and programs and challenges us to look at our work and ourselves holistically.

Integrity, whether personal or institutional, implies coherence between words and acts. It calls each member of community to live in accord with what the College professes to be as an educational institution. Integrity suggests both certain wholeness in the College itself and connections between the College and the larger educational and social worlds in which it functions.

Diversity:

Diversity builds a community that fosters a climate that is open and welcoming to diverse people, ideas and perspectives; that promotes a constructive discourse on the nature of diversity; and that engages faculty, staff and students in activities that promote the core values.

Today's diverse student body has expanded such early diversity, and the College continues its efforts to enrich the diversity of its faculty and staff. Such diversity strengthens our academic program and educational environment, preparing students to expose to the society and global economy and to inculcate a sense of brotherhood and national integrity.

Learning for Life:

Learning for Life is our maxim that encourages us to pursue knowledge and truth throughout our lives in ways that improve our communities and ourselves and that strengthen our understanding of each other.

Our commitment to education as a means of liberating people to live meaningful lives and as well as earn a decent living being useful to the Society and Nation as well. To prepare citizens who would grow to be competent enough to contribute significantly with personal integrity and civil responsibility for the development of this region in particular and the nation in general.
