Vaagdevi Educational Society was established in 1993 with a philanthropic objective in providing educational services in Telangana region. The Society has established many colleges in the name of Goddess Vaagdevi in different fields covering Engineering, Pharmacy, Management, Education, Medical and conventional Degree & P.G. Courses. These institutions with academicians having more experience imparting education in different areas and Today the Vaagdevi Group has a reputation for Academic performance, sports and extracurricular activities. As of today, Vaagdevi Group of Colleges have a strength of more than 25,000 students. The society has completed 25 years in imparting education and one of the largest Group of Colleges in Warangal after Hyderabad in Telangana State.

ABOUT THE DEPARTMENT:

The Department of Business Management was established in 2007 in Vaagdevi College of Engineering, Bollikunta, offering two years full time programme in Business Administration with the annual intake of 60 students. Presently MBA course is being offered Autonomous status CBCS pattern and present intake is 180 students. Well qualified and experienced Faculty Members, Staff, Students and Management has led the department on to the path of academic excellence with a number of achievements during the last few years. It has been continuously contributing to the generations and spreading of knowledge in the area of business and

Over the years, the banking sector in India has seen a number of changes. Most of banks have begun to take an innovative approach towards banking, use the concept of creating more value for customers. Information technology has given rise to new innovations in the product designing and their delivery in the banking and finance industries. Technology often acts as a tool for banks to build new systems that address a wide range of customer needs, thereby doing that may not be imaginable today. Internet banking and mobile banking made it convenient for customers to do their banking from geographically diverse places. Now all the banks have started with the concept of multi-channels like ATMs, credit cards, debit cards, telephone banking, internet banking call centers, etc. Financial innovation associated with technological change totally changed the banking philosophy and that is further tuned by the competition in the banking industry. Challenging business environment within the banking system create more innovation in the fields of product, process and market. The role of banking redefined from a mere financial intermediary to service provider of various financial services under one roof acting like a financial super market. Intense competition among the banks has redefined the concept of the entire banking system. The banks are looking for new ways not only to attract but also to retain the customers and gain competitive advantage over their competitors. In view of Technological changes in banking sector, the seminar is planned with the following objectives

- To discuss the prospects of banking technology innovations
- To identify challenges in banking technology applications
- To focus on the Government policy on banking technology
- To discuss the effect of technology on service quality

The Workshop will be organized in two sessions:

Technical session – I: Technology Innovations and Impact on Banks operational performance

Technical session – II: Technology Innovations and impact on Quality in customer services The workshop will bring academicians, bankers, regulators, etc. together to discuss the challenges and opportunities in the banking sector.
